Restoring confidence  
Let us show you how

Issue: 1 | 1 OCTOBER 2018

## Operation & Background

Celebrating its eleventh year in operation, My World Hair Transplant Center (MyWHTC) is better than ever. MyWHTC's expert staff is comprised of highly qualified medical professionals. With Dr. Patrick Mwamba as medical director, it's highly trained medical team has over 60 years of surgical hair restoration experience and has successfully treated hundreds of patients from around the globe.

Each unique patient is treated with compassion and discretion in MyWHTC's private state-of-the-art medical facility. Having many unique requirements, MyWHTC's patients demand top-notch care in a luxurious and spacious setting.

Operating rooms are designed for comfort and have television and internet access. Patients' procedures are performed in a serene atmosphere with a relaxed posture.

## Research & Education

MyWHTC strives to help every hair loss sufferer understand the process of treating hair loss as a progressive condition.

During before and during the consultation process, there are many considerations to make. Taking the big step to find the correct solution is a very delicate process. Asking the right questions should ease the concern of being fully prepared and informed about the future.

**What is hair loss?** Hair loss is a cyclical process that is uncontrollable and unpredictable in nature. Hair loss treatments often require commitment.

**Will I be happy after treatment?** Expectations and results vary from patient to patient. All treatments are based on an individual patient's genetic makeup and medical history. A current treatment plan should involve more than one avenue of approach as MyWHTC uniquely offers multiple non-surgical remedies and surgical hair restoration techniques.

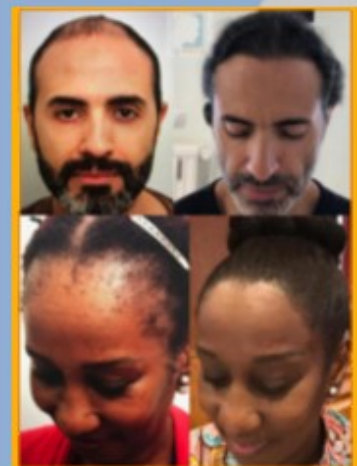

**What is a hair transplant?** A hair transplant is a surgical procedure where hair follicles are transplanted from the back of the head to the top of the head of a patient. This procedure is a permanent solution and should be performed by a trusted and highly trained surgeon.

## Contribution & Results

Patrick Mwamba, MD, chief surgeon at My World Hair Transplant Center (MyWHTC), will attend this year's ISHRS conference on October 10th in Los Angeles, California (USA). Dr. Patrick Mwamba, a world renowned contributor to the improvement of the science of refining patient outcomes from quality hair restoration practices, will present scientific research on proper hair line creation. Also, Dr. Mwamba will help other physicians implement his new concept of proper hairline design.

As a hairline expert, Dr. Patrick Mwamba has a reputation around the world for producing consistently outstanding hairline work.
